Allowable Subject Matter

1. Claims 1-10 are allowable over the prior art of record.
2. The following is an examiner's statement of reasons for allowance:

The claimed invention is directed to a remote control with a button. The independent claims identify the feature of "operating a button for a first duration less than a first threshold duration resulting in skipping a portion of a video of the video device, operating said button for a second duration less than a second threshold duration resulting in fast forwarding the video at a first rate; and operating said button for a third duration less than a third threshold duration resulting in fast forwarding the video at a second rate, wherein the second rate is faster than said first rate, wherein the first rate and said second rate is greater than a normal playback rate for said video device". The closest prior art, Braun is directed to a conventional remote control, either singularly or in combination fails to anticipate or render the above underlined limitations obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. ***

Braun discloses a video playback apparatus including a remote control means.

Armstrong discloses a remote controller with analog buttons.
